

Glycerine Bath Type Pressure Gauges

OUTLINE

This is a gauge for exclusive use exposed to vibration. Its interior is filled with liquid, preventing vibration of moving parts and wear of interior linkage mechanism, and making maintenance work easier.

FEATURES

- The wetted parts and the case are made of stain less steel so that they are excellent in anti-corrosion and enviromental resistance.
- By equipping a blowout disk, the effect of temperature change on accuracy is reduced, and breakage of glass is prevented in case the Bourdon tube bursts.
- To indicate the working pressure, safety mark (green mark) can be provided with an arrow mark only for 60mm and 75mm gauge as an option.
- * In case of selecting pressure gauge, choose the pressure range which can be used in between 30 ~ 65% of full scale, so that the gauge can give its full capacity.
- * Also should be confirmed whether the wetted parts material is suitable for the fluid or not.

SPECIFICATION

Fluid:

Gas or liquid

Size:

60 DIA., 75 DIA., 100 DIA., 150 DIA.

Mounting:

Stem

Type A

Type B (Mounting hole)

Panel

Type D (Mounting clamp, online)

Connection:

G1/4B (PF), G3/8B (PF), G1/2B (PF),
1/2NPT, 1/4NPT, R1/4 (PT),
R3/8 (PT), R1/2 (PT)

* For other connections, please contact us.

Wetted parts material:

Bourdon tube 316 st.st.
Socket 316 st.st.

Pressure range:

0 ~ 0.1 → 0 ~ 200MPa
-0.1 ~ 0 → -0.1 ~ 2MPa

Operating temperature:

5 ~ 40°C

Accuracy :

±1.5%F.S.

Window:

Organic glass

The filling up liquid:

Glycerine
(For range, less than 0.4MPa and its compound,
glycerine solution in water is used.)

Case material · finishing:

304 st.st.

Treatment: (Option)

Use no oil · water

(Manufactured and treated in a way that there shall be no oil or water residue at the wetting parts.)

Dial scale specified: (Option)

Capacity scale, Dual scale, Printed words,
Colored circle

Caution of operation:

It is established the air circulation hole in case upper part to prevent indication error by ambient temperature change about pressure gauge / compound pressure gauge / vacuum gauge less than maximum pressure 1MPa. Do up yellow plug of relief valve up. And installation posture limit it to vertical installation.

DIMENSION 1 (Unit: mm)

R3/8	18	30
R1/2	20	32

Throttle: (option)

For reducing pulsating pressure, throttle is put on the inlet port.

Corrosion-proof use FS10-013
Material: 316 st.st.

SETTING METHOD OF SAFETY MARK

Color of safety mark (option) is green and movable to any place.

Indication of pressure setting location	Set the 2pcs. of safety mark together.	
Indication of pressure setting range.	Set the safety mark at high and low set point.	

Type No. constitution

Please specify Type No.,each specification and range,when ordering.

Note: For this Model,there is no applicable item for the figures X,but please specify with X when ordering.

Size		Weight
100 DIA. In throttle	G V 4 2 Stem	1 Type A 2 Type B Approx. 1 kg
	G V 4 7 Panel	1 Type D (Mounting clamp) Approx. 1 kg
150 DIA. In throttle	G V 4 4 Stem	1 Type A 2 Type B Approx. 2.5 kg
	G V 4 9 Panel	1 Type D (Mounting clamp) Approx. 2.5 kg
60 DIA.	G V 5 0 Stem	1 Type A 2 Type B Approx. 0.3 kg
	G V 5 5 Panel	1 Type D (Mounting clamp) 6 Type D (On line) Approx. 0.3 kg
75 DIA.	G V 5 1 Stem	1 Type A 2 Type B Approx. 0.4 kg
	G V 5 6 Panel	1 Type D (Mounting clamp) Approx. 0.4 kg
